Point-of-Sale Kit

POS Keyboard with Built-in Card Reader

The POS Keyboard with built-in card reader makes entering and processing credit card and wash transactions quicker and easier. With one swipe of a credit card, all of the customer's information is displayed directly on your computer screen, eliminating the possibilities of entering credit card numbers, expiration dates, & customer names incorrectly. The POS Keyboard communicates directly with WashCard's Satellite Server, making every transaction a breeze!

POS Receipt Printer

The POS Receipt Printer is a stand-alone model that allows you to print receipts for your customers' transactions. The receipt printer, like the keyboard, communicates directly with WashCard's Satellite Server & with a simple click of the mouse, a receipt can be printed!
